Acknowledgement

The satisfaction that accompanies the successful completion of any task would be incomplete without the mention of the people who made it possible and whose constant guidance and encouragement crown all the efforts success. I am extremely grateful to our respected **Director, Prof. Mrs. K. SANDHYA RANI** for fostering an excellent academic climate in our institution. I also express my sincere gratitude to our respected **Head of the Department Mr N. SATYANANDARAM** for their encouragement, overall guidance in viewing this project a good asset and effort in bringing out this project. I would like to convey thanks to our **guide at college Ms P. UDAYASREE** for their guidance, encouragement, co-operation and kindness during the entire duration of the course and academics. My sincere thanks to all the members who helped me directly and indirectly in the completion of project work. I express my profound gratitude to all our friends and family members for their encouragement

Abstract.

Campus Placement Cell (CPC) is web-based tool to reduce communication gap between Job providers and Job seekers or students. The Main objective of this project is to make easy the recruitment process of any organization. This CPC is designed by keeping in mind both parties Job providers and Job seekers. CPC allows students to register their details like skills and experience with the system, and then on the other hand even it allows job providers to post their requirements with the system. This portal's main aim is to provide the vacancies available for the students in technologies. CPC will automatically send mails to all students whose skills are matched with the requirement.

Introduction:-

1. Introduction to Web Technologies

1.1 Internet

The Internet is a global wide area network that connects computer system across the world. The internet Provides different online services.

1.2 WWW(World Wide Web)

The World Wide Web -- also known as the web, WWW or W3 -- refers to all the public websites or pages that users can access on their local computers and other devices through the internet.

1.3 Why the Web Applications....?

Web applications have become an essential component of in today's world. By using the web applications, business can now develop and become simpler, and achieve their objectives much faster. Some common benefits of Web apps include: **Allowing multiple users access to the same version of an application.** Web apps don't need to be installed. Web apps can be accessed through various platforms such as a desktop, laptop, or mobile.

Purpose:-

The purpose of a campus placement website is to connect college students and recent graduates with potential employers for job opportunities. These websites typically provide a platform for employers to post job openings, and for students to create profiles and apply for jobs and Campus placement websites are beneficial for both employers and students. Employers can reach out to a large pool of potential candidates in one place, and students can easily find job opportunities that are relevant to their field of study and career goals. The website can also help to streamline the recruitment process, as it provides a centralized location for communication and application

Requirement Specification:-

Software Specifications:

Front end - HTML , CSS , JavaScript.

Back end – Node JS.

Database Server – My SQL.

Web Browser – Microsoft Edge, Google Chrome .

OS - Ubuntu , Windows.

Software - Xaamp Server.

Hardware Requirements:

Client side:

Ram : 512 Mb
Hard disk : 10GB
Processor : 1.0 GHz

Server Side:

Ram : 4GB
Hard disk : 20GB
Processor : 2.0 GHz

Tools and Technologies Used:-

HTML:

HTML stands for the Hyper Text Markup Language. HTML is the standard markup language for Web pages. HTML elements are the blocks of the HTML Markup. HTML elements consist of start tag, end tag and content in between them.

CSS:

CSS3 stands for Cascading Style Sheet level 3, which is the advanced version of CSS. It is used for structuring, styling, and formatting web pages. Several new features have been added to CSS3 and It is supported by all modern web browsers

JavaScript:

JavaScript is a scripting language that enables you to create, dynamically updating content, Control multimedia, animate images, and pretty much everything else

Node JS:

Node.js is an open-source, cross-platform, back-end JavaScript runtime environment that runs on a JavaScript Engine and executes JavaScript code outside a web browser, which was designed to build scalable network application.

My SQL:

MySQL is a relational database management system based on the Structured Query Language, which is the popular language for accessing and managing the records in the database. MySQL is open-source and free software under the GNU license. It is supported by Oracle Company

Learning During The project:

JavaScript:

JavaScript, often abbreviated to JS, is a programming language that is one of the core technologies of the World Wide Web, alongside HTML and CSS. As of 2022, 98% of websites use JavaScript on the client side for webpage behavior, often incorporating third-party libraries.

DBMS:

A database management system (DBMS) is system software for creating and managing databases. A DBMS makes it possible for end users to create, read, update and delete data in a database.

SQ Lite3:

SQLite is a relational database management system. It is very easy to use a database engine. It is self-contained, serverless, zero- configuration and transactional. It is very fast and lightweight, and the entire database is stored in a single disk file. It is used in a lot of applications as internal data storage.

Responsive Web Design:

Responsive web Design (RWD) is a web development approach that creates dynamic changes to the appearance of a website, depending on the screen size and orientation of the device being used to view it. RWD is one approach to the

problem of designing for the multitude of devices available to customers, ranging from tiny phones to huge desktop monitors.

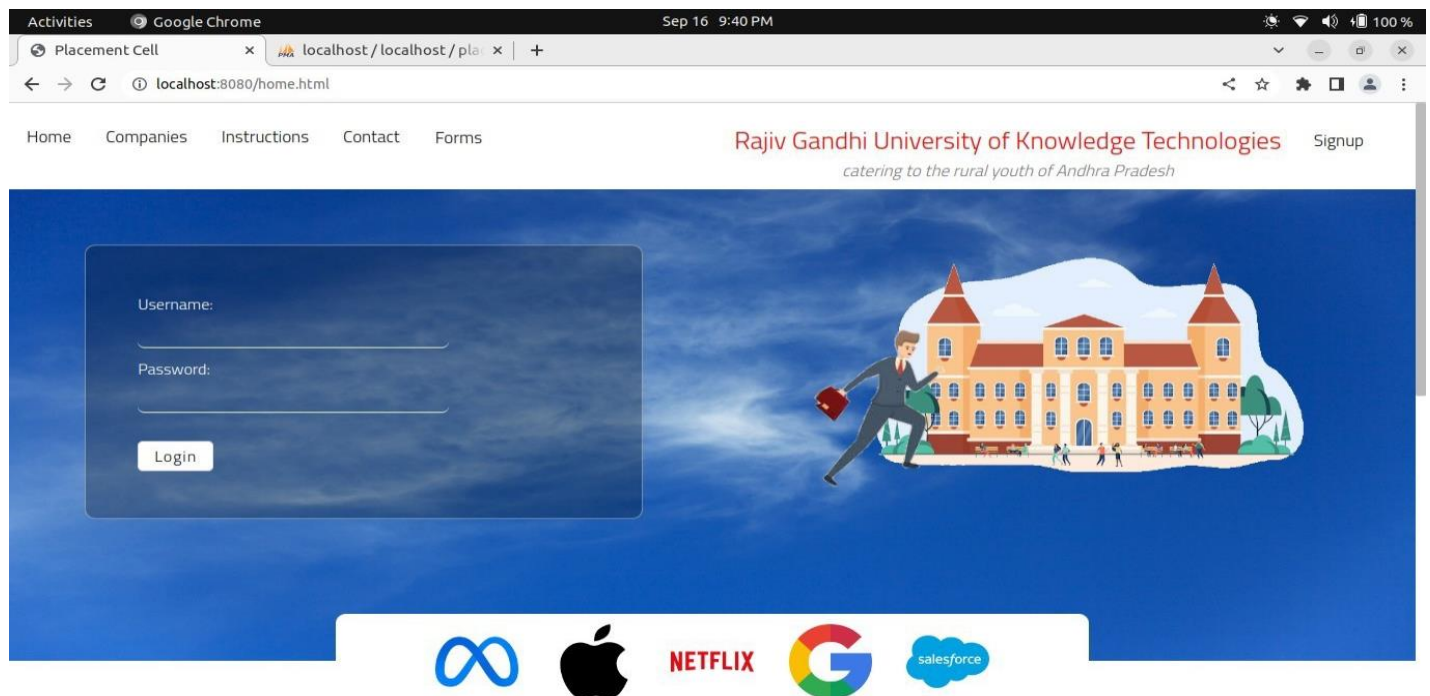

Modules:

The main aim of this website is to make job searching process easier. Students or Job seekers can log in to the website and apply for jobs which can match their skills.

Home Page:

This page Contains all the navigation steps of the website.

Sign Up page:

This is the page where use can do sign up process, if the user is new to the website.

Dashboard Page:

This page provides the statistics of students those who placed in companies.

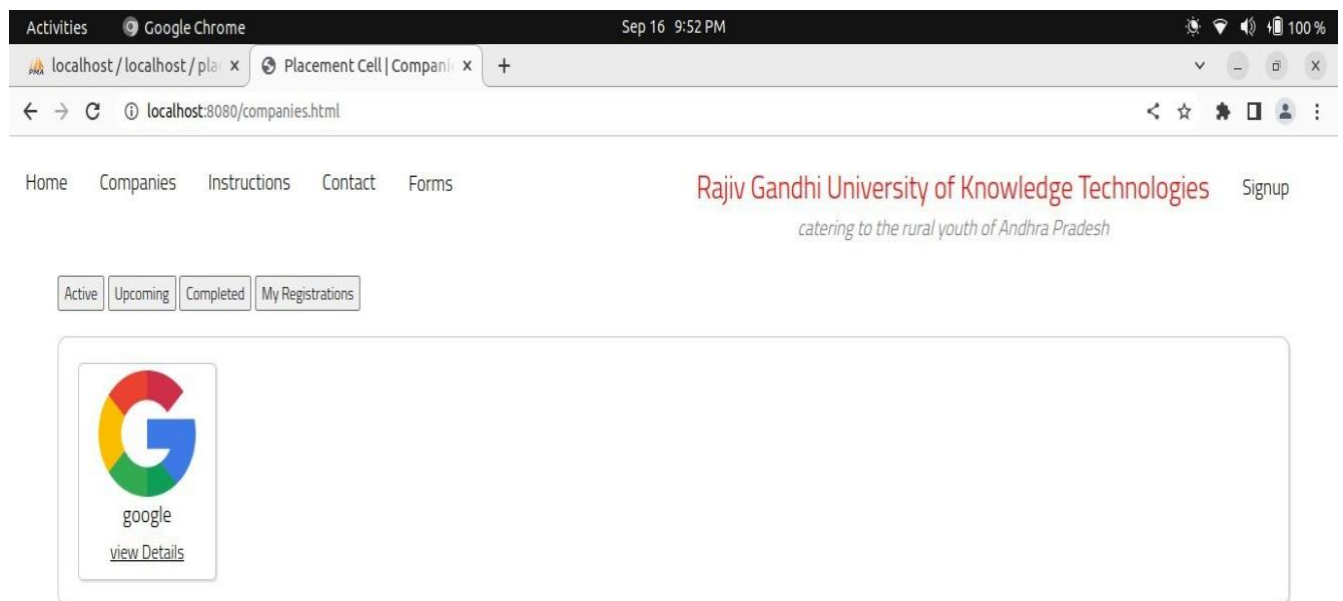

Company Details page:

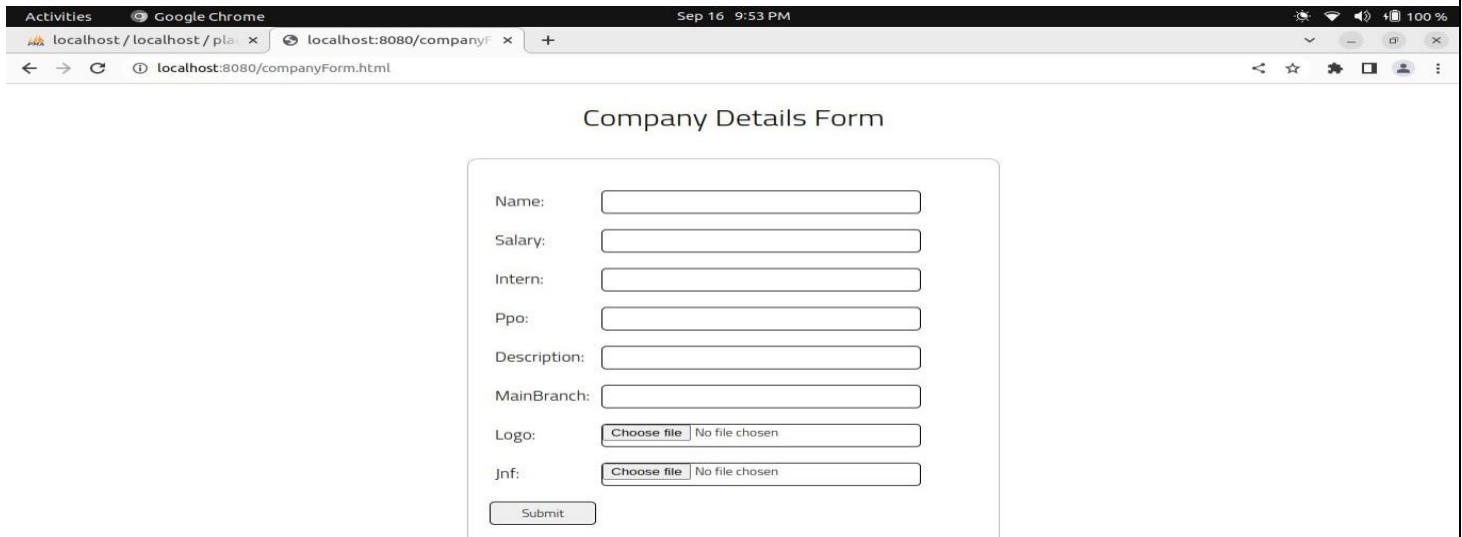

Company page:

This page helps to view all the companies which are coming for hiring and display registered Companies.

Company Details Form:

This page is used to register company details

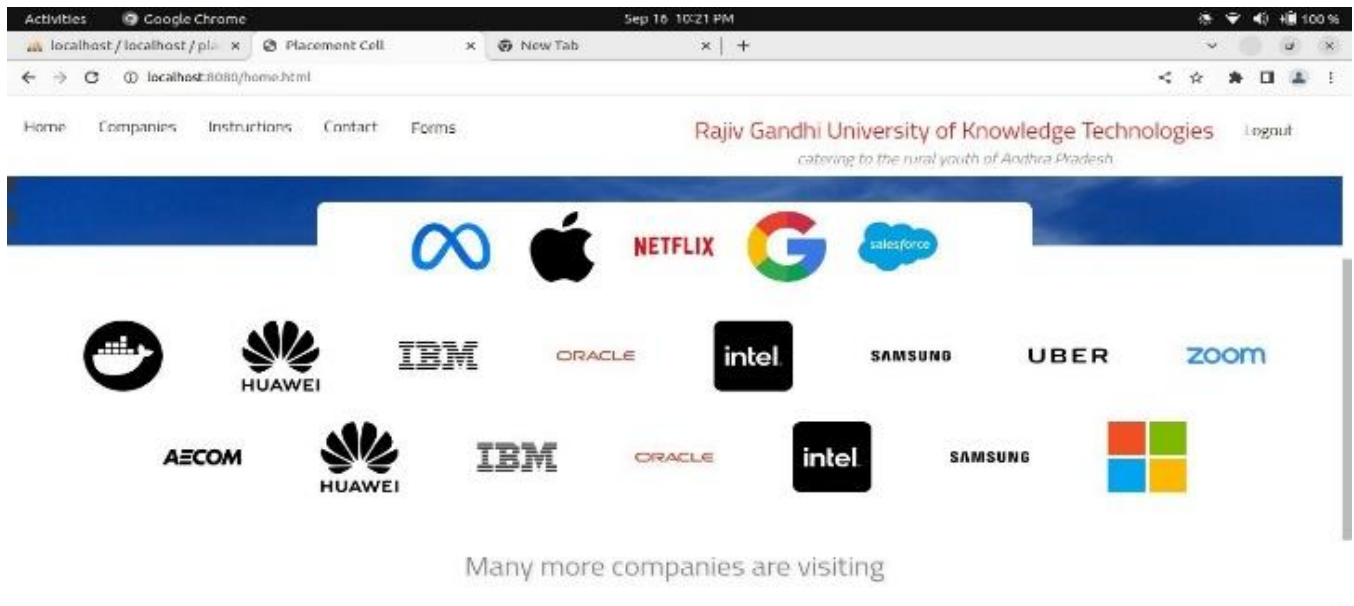

The screenshot shows a web browser window with the title 'Company Details Form'. The form is titled 'Company Details Form' and contains the following fields:

- Name:
- Salary:
- Intern:
- Ppo:
- Description:
- MainBranch:
- Logo: No file chosen
- Jnf: No file chosen
-

List of companies page:

This page Displays the list of companies to apply for jobs

Company Hiring Details:

Display the hiring details of students .

Instruction Page:

This page displays the rules and regulations regarding placements

Rules

1. Every student is eligible to register and those only will be considered for applying to appear in any of the campus recruitment drives.
2. Students, who are interested to pursue their further studies (or) not interested in doing jobs, are strictly instructed not to register for placements.
3. Students are expected to go through Job Notification Form and research about the company, job profile before applying for the respective recruitment drive.
4. Once the students have registered for the drive and got offer from the company, students should accept the offer and join the company on date as mentioned by the company. The defaulters will be debarred/blacklisted from future campus placement drives.
5. It is mandatory for the students, who have registered for a recruitment drive to attend the PPTs (Pre-Placement Talk) of the respective companies, should occupy the venue 20-mintues before the given scheduled time and will not be allowed to leave the room while the PPT in progress.
6. If anybody found misbehaving/arguing/complaining with the company officials while in any rounds of recruitment process will be considered seriously & those involved will be debarred/blacklisted from future campus placement drives.
7. Students cannot drop out from selection process once he/she has been shortlisted for further rounds unless he/she will be rejected midway by the company. A disciplinary action will be taken against defaulter student(s).
8. Students are expected not to quit any rounds of recruitment drive in a midway until they are asked to leave. 9. Students must carry their identity cards with them whenever they go through any on campus or off-campus Placement activity.
9. Student should carry at least 3 sets of copies of their latest resume, two sets of photocopies/original certificates in a proper file along with two passport size photographs for any of the recruitment drive.
10. It is the responsibility of the student to check announcements/notices/ updated information/shortlisted names etc. in coordination with CDPC.
11. If once students get placed in one company he/she will not be allowed to appear for other companies.

Dress Code :

Students are expected to follow the dress code stipulated by the Placement Committee.

1. Students must be formally dressed whenever they participate in any sort of interaction with a company

DATABASE CONNECTION:-

```
const sql=require("mysql")
const conn=sql.createConnection({
  "host":"localhost",
  "user":"root",
  "password":"",
  "database":"placementCell"
})
conn.connect(function(err){
  if(err) console.log(err);
  else console.log("database connection established");
})
module.exports=conn
```

Conclusion:

From a proper analysis of positive points and constraints on the CPC, it can be safely concluded that the project CPC is a highly e client GUI based component. Nowadays manual process of searching a job of one's choice as well as searching the appropriate candidate for a specific job has become a huge task and so realizing the need for easy management of this process, the site has been developed.

It is very easy to update and maintain information through this site. The main features of this site include flexibility, ease of manipulation of information, easy access searching, storage, reduction of manual work in an e client manner, a quick, convenient, reliable, timely and active way to reach recruiting, search and employment professionals worldwide and it is also very economical.

Future Scope:

This system is helpful for the college campus recruitment process for training and placement department to shortlist students in advance and prepares students for placements
